## Introduction

Bi-directional Communication Power Module-Hostile (BCP-H) and downlink devices (BPC, NPG).

The BCP-H (Bi-directional Communication & Power Module-Hostile) is capable of generating 300 Watt power output, providing 33 Vdc to the IntelLWD system, providing circuit breaker protection for upper and lower mounted instruments, detecting downlink data by monitoring turbine speed, ptransmitting data to the surface via a pulser. It can be installed in any position of the instrument string, which provides a lot of conveniences for the logging.

The BPC (Bypass Controller) sends commands from the surface to downhole instrument by controlling the NPG (Negative Pulse Generator) which controls the mud flow.
